

The efforts of the NAB to limit what we can hear on XM Satellite Radio are an effort to limit our rights . We XM have been of great service to my family and me. Their weather and traffic service are of great importance to us. We pay for these services and it is not for the NAB to decide what we can listen to on this great station I strongly object to their petition to limit XM's ability to provide the kind of programming that we demand and deserve.

Sincerely

Michael Kienzl
